Robert Collier Copywriting Course - Masters of Marketing Secrets: Learn to Write Sales Letters That Pay Robert Collier 2014-04-13 WHAT is there about some letters that makes them so much more effective than others? A letter may have perfect diction, a finished style; it may bristle with attention-getters and interest-arousers; it may follow every known rule; yet when it reaches where the reader sits and decides its fate, it may find itself in a wastebasket, while something lacking any polish, picks up the bacon and walks home with it. Why? People will give, when you have stirred their emotions. People will invest, when you have aroused their cupidity. And people want to know the future, so if you can persuade them that you are any sort of Prophet, they will buy your forecasting. It all comes back to the point we made in the beginning-"What do they want?" What is the bait that will attract your fish and make them bite? Find that-and you will be as successful in bringing back orders as any angler can be with a properly baited hook in bringing in the fish. Get your copy today and learn the Masters of Marketing Secrets!

**Blueprint for Reconstruction** Vincent Frank Bedogne 2010-04-14 Inspired by a vision of soaring towers, high-speed transit cars, pristine skies, and blossoming gardens, we move beyond today's automobile-based urban model and embrace a design where the freedom of the individual is paramount and the human energy that defines city life flows unimpeded within an urban matrix engineered to allow for its highest expression. Author Vincent Frank Bedogne drafts a blueprint for what humanity's Evolution of Consciousness and adoption of Economics of Fulfillment make it possible to achieve-perfection of life on earth. We draw a plan for reconstruction of the earth's urban and ecological infrastructure: the city of tomorrow, the countryside of tomorrow, how we will get around and communicate. We embrace a new environmentalism, explore future sources of energy, reveal the solution to humanity's present energy crisis, and look at how we will build to

withstand the climatic rigors imposed by a biosphere in evolution.

Virtually Amish Lindsay Ems 2022-06-07 How the Amish have adopted certain digital tools in ways that allow them to work and live according to their own value system. The Amish are famous for their disconnection from the modern world and all its devices. But, as Lindsay Ems shows in *Virtually Amish*, Old Order Amish today are selectively engaging with digital technology. The Amish need digital tools to participate in the economy—websites for ecommerce, for example, and cell phones for communication on the road—but they have developed strategies for making limited use of these tools while still living and working according to the values of their community. The way they do this, Ems suggests, holds lessons for all of us about resisting the negative forces of what has been called “high-tech capitalism.” Ems shows how the Amish do not allow technology to drive their behavior; instead, they actively configure their sociotechnical world to align with their values and protect their community’s autonomy. Drawing on extensive ethnographic fieldwork conducted in two Old Order Amish settlements in Indiana, Ems explores explicit rules and implicit norms as innovations for resisting negative impacts of digital technology. She describes the ingenious contraptions the Amish devise—including “the black-box phone,” a landline phone attached to a device that connects to a cellular network when plugged into a car’s cigarette lighter—and considers the value of human-centered approaches to communication. Non-Amish technology users would do well to take note of Amish methods of adopting digital technologies in ways that empower people and acknowledge their shared humanity.
