01-01 A fisherman's life isn't as calm and serene as some might think. In fact, it usually involves backbreaking work, torrential rain, and sometimes even extreme danger.

Exciting photographs take readers aboard the freezing, damp conditions of an Alaskan crab boat, one of the deadliest workplaces in the world. Readers will learn about the many obstacles and challenges fishermen face and also why they keep heading back out to sea.

Freshwater Life Charles Griffiths 2015-10-01 Freshwater life – the first illustrated field guide of its kind for the wider southern African region – describes a vast range of plant and animal groups in a single volume. A ground-breaking concept that encompasses diverse groups from the large and conspicuous vertebrates to the diverse microscopic taxa, the book facilitates identification and describes the ecology of more than 1,000 freshwater organisms.

Species have been selected on the basis of how likely they are to be encountered, and each account is accompanied by photographs and a distribution map. A comprehensive introduction details the ecology and signifi

cance of freshwater systems. This indispensable, easy-to-use guide will prove invaluable to outdoor enthusiasts, students and conservationists.

Introduction to the Biology of Marine Life Morrissey 2016-11 Introduction to the Biology of Marine Life is an introductory higher education textbook for students with no prior knowledge of marine biology. The book uses selected groups of marine organisms to provide a basic understanding of biological principles and processes that are fundamental to sea life.

The Entangling Net Leslie Leyland Fields 1997 "Truly remarkable portraits of courage." -- John van Amerongen, editor, Alaska Fisherman's Journal "These little-known tales of women working in Alaska's commercial fishing industry make for great reading. . . . Readers will be amazed by their stories." -- Laine Welch, Alaska Fish Radio "A richly textured story, a multi-genre text that invites readers to witness women's conversation with

America's last frontier, Alaska." -- Patricia Foster, University of Iowa Why do women choose an occupation that has been ranked the most dangerous in the nation? What do women give up--and get in return--when they take on the tasks of fishermen? The Entangling Net explores these issues through the stories of twenty women who have chosen to work in this extremely risky, male-dominated profession. Leslie Leyland Fields lyrically weaves their stories with her own experiences as a fishing woman. She tells of long, exhausting days in skiffs, catching fish in brutally cold weather on waters that are often violent. Her words and those of the women she interviews convey the paradoxical relationship the women have with commercial fishing: they face extraordinarily difficult working conditions made more difficult and dangerous by male crews and skippers who don't welcome women, yet they feel impelled by the challenge of the work to return to their jobs season after season. Bering Sea Chinook Salmon Bycatch Management, Regulatory Impact Review/initial Regulatory Flexibility Analysis 2009

California's Living Marine Resources William S. Leet 2001 This 592-page spiral-bound reference provides a baseline of information for all those involved with managing living marine resources in California and chronicles changes that have occurred in many of the state's fisheries. Organized by marine ecosystems: bays and estuaries, nearshore and offshore. Includes illustrated species descriptions with details of biological knowledge, fishery history, landings data, population status and references. Also includes sections on marine birds and mammals and

appendices containing management considerations (by species), a glossary of technical terms and acronyms and fishing gear illustrations. Jointly produced by the California Sea Grant Extension Program and the California Department of Fish and Game following the passage of the Marine Life Protection Act in January 1999. The risks and vulnerability of the sardine fisheries sector in the Republic of the Philippines to climate and other non-climate processes Labaria, E.C., Fernandez de la Reguera, D., Poulain, F., Siar, S., Vasconcellos, M. 2021-11-25 This publication represents the proceedings of the national workshop “Risks and Vulnerability of the Sardine Fisheries Sector to Climate and other Non-Climate Processes”, held in Quezon City, Republic of the Philippines, in September 2019 (Chapter 1). It also presents the baseline reports compiled for the workshop. Hearings United States. Congress. Senate. Committee on Interior and Insular Affairs 1964

Regulation and Compliance in the Atlantic Fisheries Stig S. Gezelius 2012-12-06 This is a book about fishermen's reasons for obeying fisheries law. The fish harvesting industry has become subject to state interference to an increasing extent over the past twenty years. As natural resources become scarce and subsequent fisheries regulations abound, the question of law-abidingness is brought to the public agenda. However, there is still little empirical data as regards the dynamics of compliance in this field, and this book aims to meet a demand for in-depth knowledge. The cases studied can be regarded as instances of economies dependent on the harvesting of natural resources for both household and the market, and

the study aims to contribute to the building of more adequate theory on the dynamics of compliance in such economies. However, focusing on a specific type of setting seldom constitutes a safe escape route for getting away from more pervasive sociological questions, and it certainly does not in this case. As any attempt to explain social phenomena, this study is faced with the fundamental sociological question of how the acts of individuals can best be understood. The question concerns the interface between the individual and the collectivity – between collective morality and self-interest. It thus deals with classical sociological issues such as the nature and regulatory capacity of group norms and sanctions, and the forms and roles of rationality and strategic action.

Alaska Is My Mistress Jerre Wills 2014-09-15 Jerre Wills was in his late teens when he began feeling something tugging at his shirt-tail, and finally pulling with the force of a 300 pound barn-door halibut heading for deep water on the end of a fishing line. Whatever the powerful pull was, its 5,000 mile beckon, brought the young Wills family to Alaska in March of 1959. First it was the homestead; hunting soon followed; commercial fishing, an improbable occupation became a passion; and becoming a pilot and flying small bush-planes was justified by guiding big game hunters. All of these adventures gave Jerre an appreciation for Alaska's land, sea, and air. Alaska's allure became a 55-year love affair with the Greatland. Alaska Is My Mistress is the story of Jerre Wills' non-stop

Alaska seduction.

Living with Oil Lisa Breglia 2013-05-15 For decades, Mexico has been one of the world's top non-OPEC oil exporters, but since the 2004 peak and subsequent decline of the massive offshore oilfield—Cantarell—the prospects for the country have worsened. Living with Oil takes a unique look at the cultural and economic dilemmas in this locale, focusing on residents in the fishing community of Isla Aguada, Campeche, who experienced the long-term repercussions of a 1979 oil spill that at its height poured out 30,000 barrels a day, a blowout eerily similar to the 2010 Deepwater Horizon disaster. Tracing the interplay of the global energy market and the struggle it creates between citizens, the state, and multinational corporations, this study also provides lessons in the tug-of-war between environmentalism and the lure of profits. In Mexico, oil has held status as a symbol of nationalist pride as well as a key economic asset that supports the state's everyday operations. Capturing these dilemmas in a country now facing a national security crisis at the hands of violent drug traffickers, cultural anthropologist Lisa Breglia covers issues of sovereignty, security, and stability in Mexico's post-peak future. The first in-depth account of the local effects of peak oil in Mexico, emphasizing the everyday lives and livelihoods of coastal Campeche residents, Living with Oil demonstrates important aspects of the political economy of energy while showing vivid links between the global energy marketplace and the individual lives it affects.

Living Marine Resources Edwin S. Iversen 2012-12-06

Living Marine Resources provides a thorough, up-to-date introduction to all aspects of fisheries science. This clearly written text offers insight into a topic of increasing importance--the wise utilization and management of sea fisheries to maximize production without exceeding their carrying capacity. Adoption of the approaches presented will improve the conservation and management of the many world fisheries that are suffering from years of inefficient practices. The book is divided into five sections, beginning with an introduction to the ocean environment and the various resource species. Part two examines fisheries biology, including age, growth, fecundity, and mortality, enabling readers to appreciate yield models designed to give estimates of maximum sustainable yield and maximum economic yield. The third part covers gear, methods, and landings and includes material on the handling and processing of seafood as well as aquaculture. In part four, yield models are presented to introduce students to theories on population dynamics, stock assessment, and management. The book concludes with coverage of recreational fisheries, including socioeconomic importance, catch and effort research, management techniques, and their interface with commercial fisheries. Living Marine Resources is an invaluable introduction to the subject for advanced undergraduate and graduate students of fisheries science. In addition, the material presented will be valuable to fishery and social scientists, fishery officers and administrators, and students in biology, engineering, economics, and law.

A Hard Way to Make an Easy Living Corky Decker 2011-

02-24 Its often been said that a bad day of fishing beats the best day at work. But what happens when fishing is your work? In *A Hard Way to Make an Easy Living*, author and career fisherman Corky Decker recaps his lifelong fishing adventures. From his start as a young boy intrigued by the sea working for tips on party sport fishing boats out of Ogunquit, Maine, to captaining a multimillion-dollar factory trawler that fished Alaskan waters, his stories of successes and failures provide an insiders look at the lives of men and women who go to sea to fish. The story demonstrates why commercial fishing is not just a job, but a way of life. In this memoir, Decker tells of trawling and harpooning bluefin tuna on the East Coast until the lure of Alaska found him walking the docks of Kodiak in 1985; he recounts his experiences of the fisheries he worked in Alaska. *A Hard Way to Make an Easy Living* underscores the continual controversy between the fishing industry and fisheries management and the influence of foreigners in US waters.

American Folklife Don Yoder 2014-11-06 Knowledge of folk custom and folk belief can help to explain ways of thought and behavior in modern America. *American Folklife*, a unique collection of essays dedicated to the presentation of American tradition, broadens our understanding of the regional differences and ethnic folkways that color American life. Folklife research examines the entire context of everyday life in past and present. It includes every aspect of traditional life, from regional architecture through the full range of material culture into spiritual culture, folk religion, witchcraft, and other forms of folk belief. This collection is especially

useful in its application to American society, where countless influences from European, American Indian, and African cultural backgrounds merge. American Folklife relates folklife research to history, anthropology, cultural geography, architectural history, ethnographic film, folk technology, folk belief, and ethnic tensions in American society. It documents the folk-cultural background that is the root of our society.

The Perilous Catch Mike Smylie 2014-11-03 This is the story of Britain's commercial fishermen, who have sailed out into the ravages of the surrounding seas to bring back the fish to feed their country for centuries. Theirs is one of history's most dangerous jobs, and whole communities have been affected by disasters from which a number of the town's men may not have returned: in 1872 some 129 fishermen were lost in one night alone. Loss of life in the industry was caused by a number of factors: extreme weather conditions, lack of emergency support, and, perhaps most crucially, most couldn't swim. Today commercial fishing is still one of the most perilous occupations in the country, claiming the lives of the fishermen and consuming those of the families left behind. Thus it is clear how poignant this history is to the occupation."

Living Marine Resources of Kuwait, Eastern Saudi Arabia, Bahrain, Qatar, and the United Arab Emirates Kent E. Carpenter 1997 Covers the major resource groups likely to be encountered in the fisheries of the Persian Gulf. These include seaweeds, shrimps, lobsters, crabs, bivalves, gastropods, cephalopods, sharks, batoid fishes, bony fishes, turtles, sea snakes, seabirds and marine

mammals.

The World of the Seafarer Victor Oyaro Gekara 2020-12-03 This open access book constitutes an ethnographic mosaic which depicts the contextual complexities of the life and work of seafarers who are employed in the international merchant cargo fleet. The collection is based upon the observations and interviews of researchers in multiple disciplines. It is woven together to offer a richly detailed insight into the ways in which a complex global industry operates internationally. The book covers issues to do with career decisions and recruitment, gender, life and work on board multinational vessels, health and safety issues, the regulation of the industry, shipboard roles and role conflict, and the representation of workers. It will be of considerable interest to all students globally who are studying for professional seafaring qualifications, to graduate students studying for masters courses in ship and port management, and to welfare professionals and policy makers. It is of special interest to those connected to the shipping industry who specialize in issues relating to 'the human element' and will serve as a paradigm defining text in this area.

Who Says Life Is Fair?: The Story of a Loving Dad. His Life, His Losses, and How He Came Out a Winner. James C. Wilson 2010-02-01 This book is about the life of a loving and responsible father who has lost his relationships with his adult children. This circumstance provides the background for a captivating, human story which will ring true for a soberingly large number of loving parents to whom a loss of this nature has occurred. Such readers will have a strong frame of reference from which to relate to the story. For others who are simply students of the human condition, this well-crafted excursion into the life of another everyman is thoroughly worth the undertaking. The book takes us from one recollection to another, be they light- hearted and uplifting or stark and

powerful, with deftness and brevity. The way in which the tragic loss of cherished children is transformed into a joyful life of purpose and love is an uplifting story which makes a worthwhile and gratifying read. A set of principles is offered as a recipe to help those for whom personal loss creates continuing pain. This provides a positive and effective means to help readers gain, even in the face of tragedy, the same kind of life success which has been experienced by the man about whom this story is written.
