Model Choice in Nonnested Families Basilio de Bragança Pereira 2016-12-30 This book discusses the problem of model choice when the statistical models are separate, also called nonnested. Chapter 1 provides an introduction, motivating examples and a general overview of the problem. Chapter 2 presents the classical or frequentist approach to the problem as well as several alternative procedures and their properties. Chapter 3 explores the Bayesian approach, the limitations of the classical Bayes factors and the proposed alternative Bayes factors to overcome these limitations. It also discusses a significance Bayesian procedure. Lastly, Chapter 4 examines the pure likelihood approach. Various real-data examples and computer simulations are provided throughout the text.

Omgaan met conflicten Anselm Grün 2017-04-25 Monnik en therapeut Anselm Grün stelt in *Omgaan met conflicten* dat waar mensen samenleven en -werken conflicten onvermijdelijk zijn. Lastig, maar in een conflict komt ook positieve energie vrij, die reinigend en verzoenend kan werken. Volgens Grün moeten we conflicten niet verdringen, maar onder ogen zien. Daarvoor reikt hij psychologische inzichten aan en bespreekt hij bijbelse verhalen over de oervormen van het conflict. Hiermee kunnen we conflicten zo hanteren dat ons eigen samenleven en samenwerken erop vooruitgaan.
